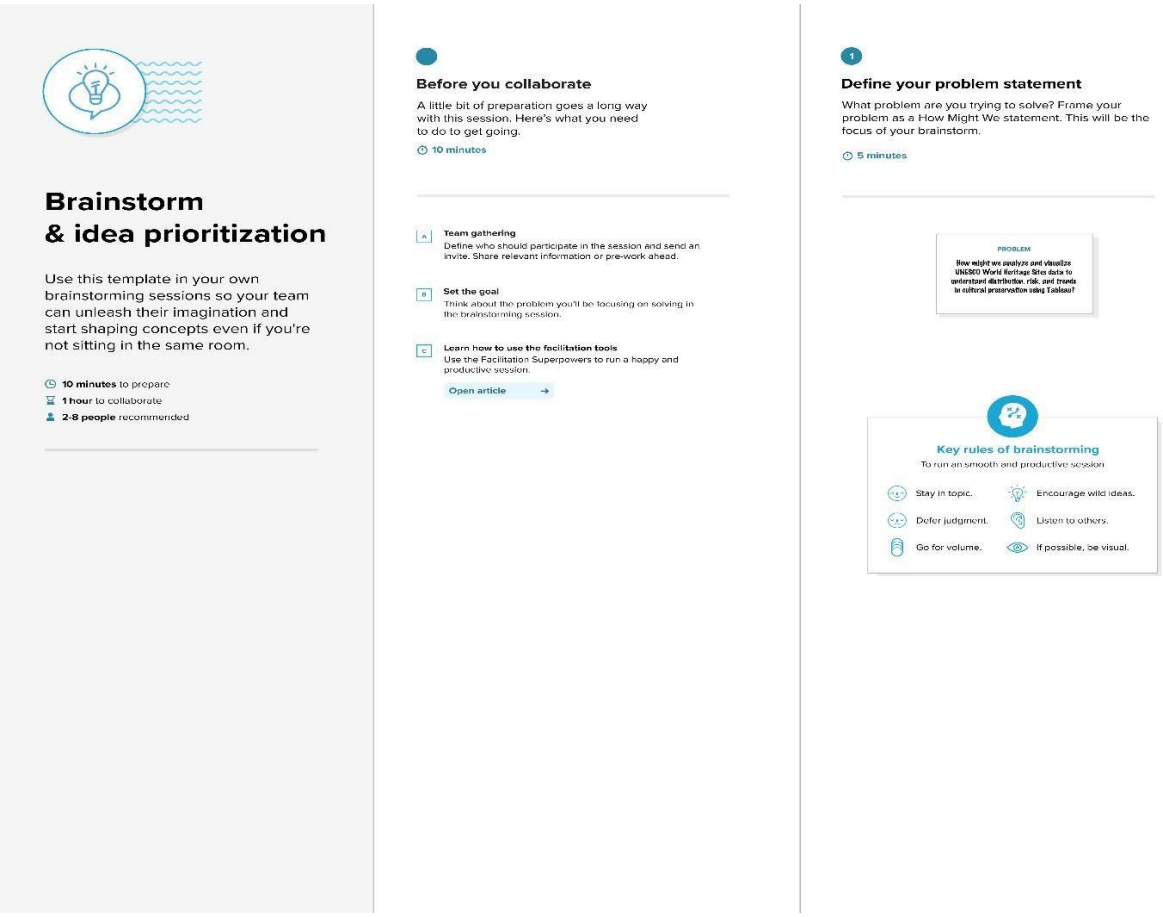
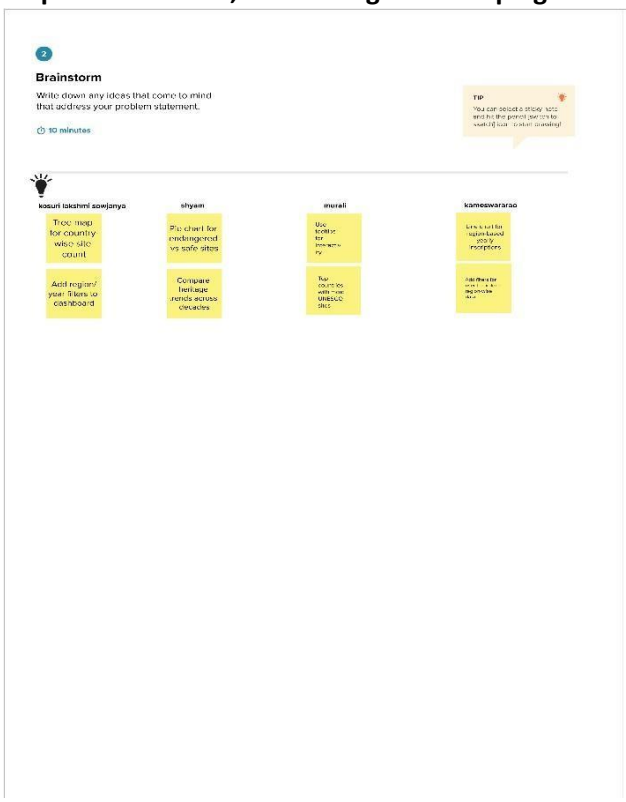
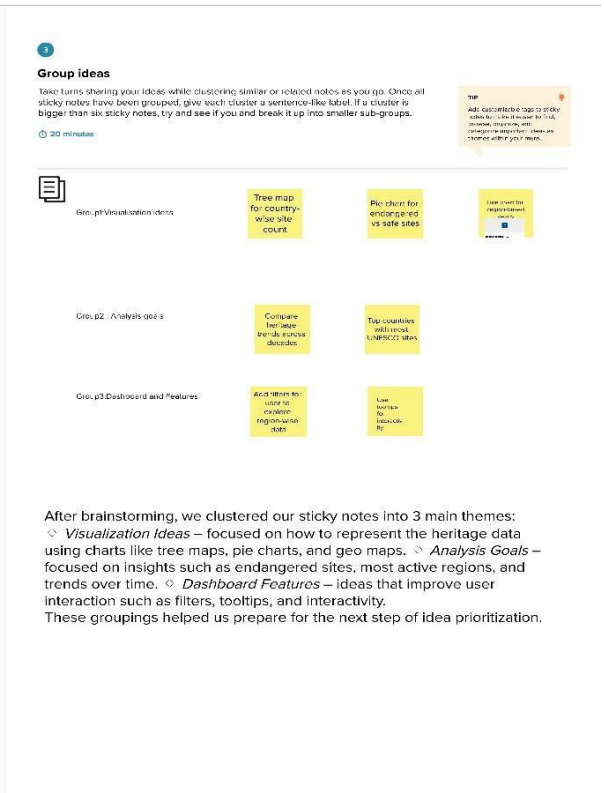
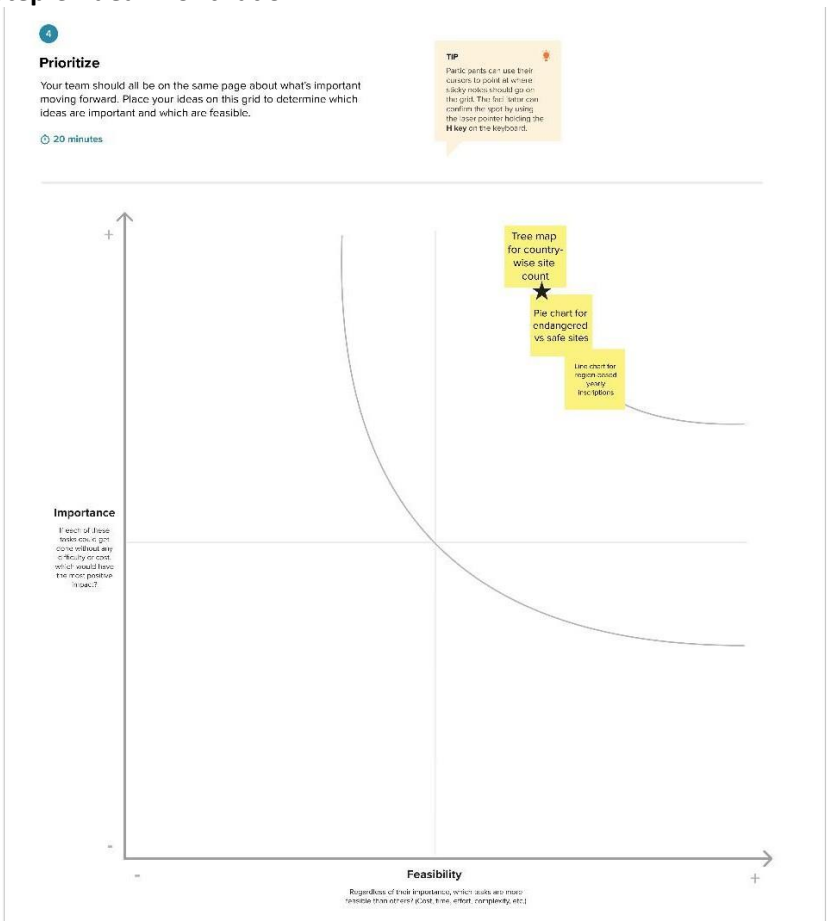
Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping





After brainstorming, we clustered our sticky notes into 3 main themes: *Visualization Ideas* – focused on how to represent the heritage data using charts like tree maps, pie charts, and geo maps. *Analysis Goals* – focused on insights such as endangered sites, most active regions, and trends over time. *Dashboard Features* – ideas that improve user interaction such as filters, tooltips, and interactivity.
These groupings helped us prepare for the next step of idea prioritization.


Step-3: Idea Prioritization
